Men have many roles

From Dad and role model; to friend, companion & spouse; all the way to Grandparenting and beyond- and those are just the relationships!!- What else is included?

Parent

Spouse

Friend

Grandparent

A child's health is directly tied to his or her father's presence. From emotional and behavioral issues, to sexual activity and abuse and neglect, father absence affects many issues related to child health

WHEN DADS ARE INVOLVED:

Babies are healthier, with fewer complications at birth, four times more likely to celebrate their first birthday, less likely to experience sudden infant death syndrome, and have improved learning and emotional development. Children are more likely to go to well-baby visits, and have higher developmental scores and fewer behavior problems later in life.
